DESIGN FEATURES:

- Vertical stem
- Vertical transom
- Low free board
- Sweeping tumblehome
- Classic hardware
- Engine forward/cockpit aft
- No deck seams
- *Various color schemes available

DESCRIPTION & PERFORMANCE:

The Hacker-Craft Racer provides a beautifully balanced ensemble of performance and class. The racer is built on a Runabout hull with a reconfigured deck arrangement and engine placement. It's timeless lines are reminiscent of the golden era when the gentleman's sport of boat racing was a focal point of high society.

With the engine forward and cockpit aft, the racer resembles a roadster on water. The concave warped bottom provides a gliding and graceful ride, cutting through reasonable chop. Ideal conditions are under 1 meter.
