- Barrel back transom
- Moderate free board
- Sweeping tumblehome
- Wide beam
- Wrap around windscreen
- Deco hardware
- Wood grated floor hatches
- Extended second cockpit
- Traditional deck seams
- *Various color schemes available

DESCRIPTION & PERFORMANCE:

The Sterling is a modified Runabout. It boasts 9" more beam than the Runabout and Sport models (single engine). The design was created in 2010 and resembles 1950's and 1960's lines and appeal. An art deco flair can be found in the specially crafted floor grates, raked flag staffs and wide lines. The tumblehome is especially pronounced into a barrel back transom.

The Sterling is displayed with Mahogany/Blonde stain scheme and a red interior and bottom. However, various color schemes are available.

The concave warped bottom provides a gliding and graceful ride, cutting through reasonable chop. Ideal conditions are under 1 meter.

(The Sterling model is named in honor of the Sterling Engine Company of Buffalo, New York. Sterling engines were installed in many of Hacker-Craft's early runabouts.)
